PURPOSE: To obtain the new composition consisting essentially of hinokithiol and a metal soap comprising a metal other than an alkali metal and capable of keeping hinokithiol in stable state with the lapse of time to light and heat in storing or during use.

CONSTITUTION: This composition consists essentially of (A) hinokithiol and (B) a metal soap (preferably aluminum salt such as aluminum monostearate) comprising a metal other than an alkali metal. The blend amount of the component A is preferably 0.01-1wt.% based on total amount of the composition and the component B is preferably blended in amounts of ≥ 0.1 wt.% based on 1 pt. wt. of the component A and ≤ 5 wt.% based on the composition.

Legal Status: There is no Legal Status information available for this patent
